**Work Experience:**

Senior WEB Developer

May 2024 – Present

N-iX

Remote

**Project:** Travel Tours Aggregator Platform. A platform for searching and booking comprehensive travel packages (flights, hotels, transfers, insurance).

**Responsibilities:** Development of new features according to technical specifications and design requirements | conducting code reviews and optimizing existing code to improve performance | maintaining and updating the Node.js backend of the platform.

**Achievements:** Delivered a full project redesign with a strong focus on accessibility and improved user experience (UX) | migrated the project to a new URL structure to enhance SEO performance.

Senior Full-Stack Developer

Oct 2024 – Aug 2025 (10 months)

Softjour

Remote

**Payment Processing System (Card Payments)** A payment system project with nearly 30 years of history; the company processes approximately 20% of all card payments in Ukraine.

**Responsibilities:** Development of new payment system services | conducting code reviews | participating in sprint planning and task estimation | mentoring junior developers | collaborating with cross-functional teams to coordinate integrations and resolve technical issues.

**Achievements:** Developed the front-end part of a domestic P2P money transfer service.

**Event Ticketing Platform** A service for event creation and management, ticket sales, and ticket validation.

**Responsibilities:** Refactoring existing codebase | implementing new payment methods.

**Achievements:** Implemented Stripe payment system integration for ticket purchases.

Middle Front-End Developer

Feb. 2023 – Oct. 2024 (1 year 8 months)

Softjour

Remote

**Payment Processing System (Card Payments)** A payment system project with nearly 30 years of history; the company processes around 20% of all card payments in Ukraine.

**Responsibilities:** Implementation of payment page designs in accordance with technical requirements | integration with backend services for payment processing and data validation | maintenance of a Node.js service responsible for email notifications related to transaction statuses.

**Achievements:** Standardized the development approach for payment pages by creating a set of reusable components | improved page load times through lazy loading and code splitting | refactored the existing codebase by removing legacy libraries such as jQuery and migrating the project to a modern technology stack.
