### Work Experience:

Senior WEB Developer

May 2024 – Present

N-iX

Remote

**Project:** Travel Tour Aggregator | Platform for searching and booking comprehensive package tours (flights, hotels, transfers, insurance).

**Responsibilities:** Develop new features according to product requirements and design mockups | Conduct code reviews, optimize performance, and improve code quality | Maintain and develop Node.js backend part of the platform | Write unit and integration tests to ensure code coverage.

**Achievements:** Conducted redesign with focus on accessibility (WCAG 2.1 AA), reducing page load time by 25% | Migrated project to new URL architecture, reducing time for implementing new routes by 30%.

Senior Full-Stack Developer

Oct 2024 – Aug 2025 (10 months)

Softjourn

Remote

**Project:** Payment System (Card Payments) | Enterprise-level processing center for card payment processing with 20% market share in Ukraine. Includes payment interfaces, fraud monitoring, 3D Secure authentication, and integration with international payment systems.

**Responsibilities:** Led design and development of new company services | Conducted code reviews and mentored junior/middle developers | Led sprint planning, task decomposition and estimation | Engaged in cross-team communication to coordinate integrations and resolve technical challenges.

**Achievements:** Developed frontend for P2P card transfer service within Ukraine.

**Project:** Event Ticketing Service | Event management platform with ticketing system: event creation and management, online ticket sales with various pricing tiers, QR validation at entry, payment system integration, and reporting system for organizers.

**Responsibilities:** Worked on legacy code refactoring to improve maintainability and scalability | Collaborated with payment team on integration of payment systems with 3D Secure support and card tokenization.

**Achievements:** Integrated Stripe Payment Processing with 3D Secure (SCA), tokenized cards, and recurring payments support.

Middle Front-End Developer

Feb. 2023 – Oct. 2024 (1 year 8 months)

Softjourn

Remote

**Project:** Payment System (Card Payments) | Enterprise-level processing center for card payment processing with 20% market share in Ukraine. Includes payment interfaces, fraud monitoring, 3D Secure authentication, and integration with international payment systems.

**Responsibilities:** Worked on adaptive payment form development with support for various card types and payment methods | Collaborated with backend team on API for payment processing and data validation | Maintained Node.js service for processing email notifications about transaction status.

**Achievements:** Standardized payment page development by creating a reusable component library | Improved payment form loading speed through lazy-loading and code splitting | Modernized codebase by replacing outdated libraries (including jQuery) with modern technology stack.

Languages, Tools & Technologies

Vue.js	Nuxt.js	TypeScript	JavaScript	HTML5	CSS3
Tailwind CSS	Pinia	Vuex	Express.js	Node.js	REST API
GraphQL	MongoDB	PostgreSQL	Redis	Firebase	Git
GitLab pipeline	Docker	Jenkins	Webpack	Vite	Jira
Confluence	Postman	Cypress	Playwright	ESLint	Prettier
Apple Pay	Google Pay	Click2Pay	OAuth	TWA	PWA

Side Projects

[Chrome extension](#) for listening to Ukrainian radio stations with an active audience of 600+ users. Implemented the full development cycle: from architecture design to publication in the Chrome Web Store. Developed an intuitive UI/UX with multilingual interface, implemented state management through Pinia, integration with Chrome Extensions API for audio streaming and localStorage. Optimized performance through lazy loading of components. The project includes 40+ radio channels and real-time playback control

Education

Beetroot Academy	HTML Academy	Classic Private University
Front-End Development Course	HTML & CSS Course	Institute of Journalism and Mass Communication, Master's Degree
2019	2019	2012
